

Peer Review 2 Worksheet

CFAN 3091V | Week 11 Methods and Outcomes

Reviewer: _____ **Writer:** _____

Draft title or topic: _____

Use page or line references. Proposal Development writers bring methods and expected results. Fall Graduation writers bring methods and actual Results and Discussion.

Review the Design

1. **Question and method.** What is the research question, and do the units, population or cases, comparison, and procedure match it?

2. **Inspectability.** What detail is missing that would keep a reader from understanding the materials, steps, measurements, or analysis?

3. **Outcome logic.** Are the expected outcomes distinguishable from each other? For an actual thesis, do the claims stay within the reported evidence?

4. **Constraints.** Identify one access, time, permission, ethics, or feasibility constraint the writer addresses or still needs to address.

5. **Discussion and literature.** Where does the draft connect the outcome to the literature, and where is that connection missing or overstated?

6. **Highest-priority revision.** Give the page or line reference, the revision, and why it matters more than sentence-level editing.

Writer Response

Respond to the highest-priority comment:

☐ Accept and revise ☐ Decline with reason ☐ Need more information

Comment and page or line reference: _____

Response and next action:

Professional Review Plan
