

Two-Outcome Table

CFAN 3091V | Week 11 Expected Results

Student: _____ **Date:** _____

Research question:

Hypothesis or design expectation:

Outcome Comparison

For a proposal, describe what you expect if the hypothesis holds and if it does not. For the Fall Graduation track, use the rows to compare the actual result with the result your design was intended to distinguish.

Table 1: Two-outcome planning table.

	Hypothesis supported / Result A	Hypothesis not supported / Result B
Prediction in measurable units		
Table, figure, or pattern I would expect		
What the reader should conclude		
Literature connection		
Limitation or alternative explanation		

Distinguishing Evidence

What measurement, comparison, or pattern would let a reader tell A from B?

What would remain uncertain even after the evidence was collected?

Discussion Sentence

Write one sentence that connects the more important outcome to the literature without claiming more than the design can support.

One question I need to carry into Peer Review 2: _____
