

Visual Audit and Caption Clinic

CFAN 3091V | Week 12 Figures and Tables

Student: _____ **Visual number:** _____

Title or short description: _____

Stand-Alone Test

Without reading the surrounding paragraphs, can a reader answer each question?

- ☐ What is shown? ☐ Who or what is represented? ☐ What are the variables or comparisons?
☐ What do the units and denominators mean? ☐ What do the symbols, colors, or line types mean?
☐ What uncertainty or statistical notation is shown? ☐ What is the data source or boundary?

What the reader still cannot tell:

Design Audit

- ☐ The visual adds information beyond the prose.
☐ The scale and ordering do not exaggerate or hide the comparison.
☐ Axes, headers, units, and denominators are complete.
☐ The visual is readable in print and without relying on color alone.
☐ Abbreviations and uncertainty marks are explained.

Highest-priority repair:

Caption or Legend Draft

Start with the number and a specific title. Then include what is shown, who or what is represented, how it was produced, how to read the encodings, and the source or boundary.

Table caption above the table OR figure legend below the figure:

Connection to the Argument

The paragraph should explain why this visual matters, not repeat every value:

One sentence I will write before or after the visual: _____
